BODY CARE MENU (face & body)

COMPLETE FACIAL TREATMENT (IN-ROOM)

Exfoliation:

Application of an exfoliating product followed by light, circular massage strokes to cleanse the skin by removing dead cells and impurities.

Mask:

Application of a cosmetic product to the face for approximately 10 minutes to boost hydration, enhance radiance, purify the skin, and delay the signs of aging.

- A hand massage is performed while the mask is setting.

Facial Massage: KOBIDO

KO BI DO, or the "traditional path to beauty," is a genuine anti-aging facial treatment offering numerous benefits, such as a rested appearance, a balanced nervous system, and a face that is revitalized, drained, plumped, and firmed.

This traditional Japanese massage combats facial aging by alternating between muscle-toning and muscle-relaxing movements, using varying levels of finger pressure on energy meridians.

Application of day cream:

Completes the treatment by hydrating and nourishing the skin, thereby strengthening the skin barrier and protecting it against external aggressors.
